Tour and Activity Time

Teacher-led tour through the Exhibition, which showcases approximately 13 real, whole-body specimens and more than 260 organs and partial body specimens. Students will learn about the impacts of smoking, alcohol, cancer, strokes, and fractures.

Included are nine galleries: skeletal, muscular, nervous, circulatory, respiratory, digestive, reproductive/urinary, fetal (optional), the treated body, and the new prosthesis gallery. Students will learn from displayed specimens, didactics, and interactive experiences. Staff medical docents are available at the Exhibition to engage groups and answer student questions. Teacher curriculum guides and resources available through BODIES...The Exhibition. <https://bodieslasvegas.com/>
